Allocation Review Criteria

In reviewing projects located in the extra-territorial area, the City Council will consider the below criteria. Projects need not receive favorable responses to all criteria. Please address the below criteria in an attached document.

- a. Please explain why the project cannot reasonably or adequately be located within the boundaries of the City of St. Albans.
- b. Will the project result in an increase in the number and type of employment opportunities in the City or the region?
- c. Does the project directly or indirectly result in the addition or retention of employment opportunities and/or economic activity in the City?
- d. Does the project result in the relocation of employment opportunities or economic activity from within the City limits to outside the City limits?
- e. Could any relocation of employment opportunities, tax base, or economic activity from within the City limits to outside the City limits be mitigated through conditions?
- f. Does the connection result in retention of existing facilities in the City or the region?
- g. Does the project address unique environmental, public health or economic concerns for the region?
- h. Does the project support the expansion, retention or creation of facilities which provide essential or desirable public services?
- i. Does the project result in a net financial benefit or loss to the City?
- j. Could the project undermine the City's own economic development efforts?
